**Intercept 2**

Installation Sheet

**NOTE: DO NOT ATTEMPT TO INSTALL THE INTERCEPT PRIOR TO READING THESE INSTRUCTIONS**

**Step 1.** Prepare table per instructions on separate sheet. Be sure to retain portion of cut out tabletop if it will become the finished top of the INTERCEPT 2.

**Step 2.** Unpack the INTERCEPT 2, being careful not to damage any part, and check to ensure that no items were damaged during shipping. Review parts list to be sure all parts are present.

**Step 3.** TABLE THICKNESS ADJUSTMENT - The INNER PAN ASSY has four (4) adjustable mounting flanges that can be set for your specific table thickness between .656” - 1.625”. The flanges come set for the thinnest table. To change the flanges remove the lock nuts (2 per flange) and move the flanges to the hole that corresponds with the table thickness that the INTERCEPT 2 will be mounted in. Tighten the lock nuts; be sure all of the flange tops are at the same height

**Step 4.** TABLE CUTOUT MOUNTING - Attach CUTOUT PIECE, from table preparation, to top of MAIN HOUSING. The 8 pilot holes should line up. From underside of the INNER PAN, insert screws (use magnetic screwdriver) and secure the CUTOUT PIECE to the MAIN HOUSING.
Step 5. INNER PAN MOUNTING - Place the INNER PAN ASSY. to the underside of the table and secure with twelve (12) #10 X ½ screws provided, use pilot holes to ensure proper alignment. **NOTE:** USE CAUTION WHEN POSITIONING THE INTERCEPT 2 ON THE TABLE, ENSURE THAT THE GRAIN OF THE CUTOUT PIECE MATCHES THE TABLE.

- **#10 x ½ Screws**  
  Qty 12

  (If other than included screws are used, be careful not to pierce finished side)

- **Inner Pan Assembly**

- **Underside of Table**

Step 6. OUTER PAN MOUNTING - Position the OUTER PAN ASSY. below the mounted INNER PAN ASSY. Connect the power feed (Twist-Lock), and motor feed wires (RED and BLACK) from the OUTER PAN ASSY to the MAIN HOUSING Twist-Lock and motor. Be sure to feed the wire through the cutout in the OUTER PAN. Attach the OUTER PAN ASSY to the underside of table with six (6) #10 X ½ screws provided. Use pilot holes to ensure proper alignment.

- **#10 x ½ Screws**  
  Qty 6

  (If other than included screws are used, be careful not to pierce finished side)

- **Twist-Lock Connector**

- **4-Pin Connector**

- **Outer Pan Assembly**

- **Rocker Switch Assembly**

- **Inner Pan Assembly**

- **Underside of Table**

Step 7. Plug the ROCKER SWITCH ASSY onto the cable utilizing the 4-pin connector, plug in the unit and test for proper operation. By pressing the “Raise” side of the ROCKER SWITCH the INTERCEPT 2 should elevate and lock at top. By pressing the “Lower” side of the ROCKER SWITCH the INTERCEPT 2 should return to the original, retracted, position.
If INTERCEPT 2 doesn't operate, check:
1. INTERCEPT 2 is plugged into a powered outlet.
2. Twist-Lock connector between Power Unit and MAIN HOUSING is completely locked into place by twisting.
3. Motor connector is completed latched.

Step 8. ROCKER SWITCH MOUNTING – Mount the ROCKER SWITCH ASSY. in a convenient location using #10 x ½ screws provided. Secure wire as needed.

Step 9. VOICE/DATA CONNECTIONS - Raise the INTERCEPT 2, remove the 4 VOICE/DATA Plates, using the special tool provided, and snake the VOICE/DATA wires up through the OUTER PAN and through the 2 SHUTTER BUSHINGS in the bottom of the MAIN HOUSING. Wires should be dressed to move freely up and down with the movement of the MAIN HOUSING. This step can be done before mounting the INTERCEPT 2 however, be sure all wires are run through the cutout in the OUTER PAN before completing step 5.

Congratulations. Enjoy your Intercept 2.
